

CG-050/A GROUT PUMP

Air-Powered Cement Grout Pump

Description

The CG-050/A is a portable, skid-mounted, air-powered grout pump. The lightweight aluminum design makes this pump perfect for smaller cement grouting jobs.

Features

- Excellent for many applications including hollow block fills, anchor and dowel grouting, door frame grouting, hollow metal filling, machine bases, and under slab void filling.
- The holding hopper is connected directly to the suction of the pump for continuous pumping operation.
- System disassembles without tools for fast and efficient cleaning.
- All components are easily accessible for operation, cleaning, and maintenance.
- Spare parts, rental units, and servicing options are available.

Specifications

Output	Up to 19 litres per minute
Pressure	Up to 225 PSI
Power Requirements	15 CFM, 100 PSI
Dimensions	112 cm x 28 cm x 61 cm
Weight	25 kg

Components

- 2" positive displacement, pulsating piston
- 20 litre holding hopper and 1" discharge
- 12.5' grout hose with 1" camlock ends

Recommended Materials

- Pre-blended Non-Shrink grouts
 - Bentonite grouts
 - Neat cement grouts
 - Cellular grouts
- ** Avoid using grouts with added sand or coarse aggregates
